NEW ADVERTISEMENTS.

FINE HEALTHY SKIN

My little grandson having been cured of an ecseems by the CUTICIPIA REMEDIES. I was prevailed
upon by my wife and daughters to try it myself
for a distressing skin maisdy that has been the
bane of my life for twenty years.

It required a good deal of persuasion to get me
to try it, for I argued that a man seventy years of
age could not be cured by the same remedy that a
two-year-old child was. I was perfectly assonished
at the result, however. In one week my cruption
had nearly disappeared, and in two weeks there
was not a vestige of it left. A transformation
took place from a leprous to a fine, healthy skin.
My head, before I commenced the use of the CUTICUHA REMEDIES, was covered with scales and
patches of dead skin, which I could pul off in
pleces the size of a dime, while from my elbowa,
knees, and other parts of my body. I could detach strips the size of a half doilar. My head had
such an appearance that I avoided society, but
now, thanks to the CUTICURA REMEDIES, i can
once more go out with comfort, and en oy all the
pleasure of society with a satisfaction I was long
a stranger to.

BOYS' OVERCOATS.

SHOWN BY KAUFMANNS. There's nothing like it-in this city, at least. It's a stock that surpasses even our own proud records of the past. We simply set out to procure everything desirable in the line of Boys' Overcoats-and we have

HAVE YOU \$2.50

That you want to invest in a Boy's Overcoat? If so, we can give you choice from about 100 different styles-every one in fashion, sound in quality and low in price. When'll we see you?

You intend to pay for a Boy's Overcoat? At this price we have all the styles manufactured: Natty Kilt Overcoats, pleated or with cape; Lord Chumley Overcoats, Double-breasted Overcoats, Overcoats with Cape or without in Cassimeres and Cheviots, light and dark plaids, stripes and shades.

HOW DOES \$5 TO \$10

Strike you? The beautiful variety of Boys' Overcoats we show at this price simply beggars description. There are Astrakhan trimmed novelties in green, blue and brown beaver, little Sack Overcoats, box pleated Kilt Overcoats, large Scotch Plaids, and, above all, Best & Co.'s (Liliputian Bazaar, New York,) ultra fashionable garments.

"My trouble began about six years ago, when I was engaged in the flour and feed business," said Mr. F. W. Withers, a well-known Alleghenian, who lives at 128 Main street; "I was taken with frequent nose-bleed, and some days it would bleed several times. Soon my nose became raw and sore—on both sides—and it became so stopped up that I could scarcely breathe through it. I had pain about my eyes, dizziness and noises in my head. In the morning there seemed to be a shadow over my eyes. Then the catarrhal secretion began to drop into my throat, causing me to hawk and spit,
"Finally, after suffering for about three years, I took tynhold pneumonia, and from that time I rapidly grew worse. My lungs became very weak and I felt a tight, oppressive feeling in my chest; my breath became short and a cough set in. My appetite failed, had a full, uncomfortable feeling after eating, and my stomach felt very sore and tender. I could not sleep well, and I had a weary, thred feeling. Every change of weather would cause me to take cold, night sweats weakened me and I lost flesh.
"Having seen several testimonials of cures made by the Catarrh Specialists at 323 Penn avenue, I decided to take a course of their treatment. I had used local treatment from a doctor, but got no better. I am now glad to testify to my complete and permanent cure by these specialists.

In Connection With the World's Fair Drilled-The New Pipe Line Project-A Opposed by the Secretary

A PUNGENT LETTER FROM WINDOM. The Commission Must Go Very Slow in the Future in Making Use of the Funds of the Government, tory remains to be drilled in the northern and

BUT THE LIST RELUCTANTLY ALLOWED.

of the Treasury.

CHICAGO, October 21 .- President Palmer, of the National World's Columbian Commission, has received a letter from Secretary Windom, in regard to the expenses of the commission. The Secretary first states that of the \$1,500,000 appropriated, \$400,000 must be used in the construction of a Government building, leaving \$1,100,000 for other expenses. For the fiscal year ending June 30, 1891, there is appropriated jointly \$200,000 for the expenses of the commission and the uses of the Government Board of Control. The Government board has estimated that it will need \$50,000, leaving \$150,000 for the use of the commission. The secretary then shows that in salaries for officers and other expenses, the commission has disposed of \$90,000 of this \$150,000, and that the expenses of meetings of the Executive Committee now in session, and of the meeting of the commission to be held on November 15, will bring the total up to \$110,000, leaving only \$40 000 to run the commission on from

the Secretary says:

CONCERNING SALARIES. In consideration of the foregoing showing of expenses, I have hesitated as to the approval of the resolutions of the commission fixing the sularies of its officers, as described in articles 15 and 16 of your bylaws. The act of April 25, 1890, referred to, makes the Secretary of the

Ison, referred to, makes the Secretary of the Treasu y and your commission jointly responsible for the proper and reasonable expenditure of the sum appropriated by Congress for the furtherance of the provisions of the act. It does even more than that, for it imposes upon the Secretary the necessity of exercising proper discretion in approving the compensation fixed by your commission for its officers. It is fair to presume that Congress intended by this last ment-oned provision of the law to prevent the giving of what might be termed unreasonable compensation to any of the officers of the co-amission. But in arriving at this determination, the Secretary of the Treasury might take into consideration the opinions of this representative body of men.

It appears from your records, as before stated, that the commission has unanimously agreed that the officers named shall be paid the compensation stated. (President of the commission, \$12,000; Nove-Chairman of the Executive Committee, \$5,000; windows in offices of Secretary and Director-General, \$10,000.) If I were to give my individual opinion on this subject, uninduced by the acts of your commission, I should not besitate to decide that the amount named by your commission for salaries for its principal officers is greater than that probably contemplated by Congress in estimating the amount necessary to carry out the provisions of the act.

RELUCTANTLY APPROVES THE LIST.

The amount of money already expended and

the expendi -res in contemplation by your commission prior to January 1 next, contemplate so large an amount that it presents an additional reason why I should not approve the compensation named, were I alone responsible for the expenditure.
You will observe that your salary list for the years 1891, 1892 and 1895 will, without further increase of employes, amount to \$165,000, or about one-seventh of the entire sum of money outside of the cos of the Government buildings, which is fixed as the

ment buildings, which is fixed as the limit of expenditures growing out of the Exposition. I have grave doubts, in view of the facts as herein stated, whether I ought not to return the resolutions submitted by your commission is the resolutions submitted by your commission is the paid to your officers. On the other hand, I dislike extremely to set up my own personal views in opposition to those of the members of the commission who are more familiar with the matter at issue than myself. I therefore reductantly approve articles 15 and 16 of your bylaws, and beg leave to suggest, in this connection, that great care be exercised in authorizing further expenditures, to the end that your commission may not create a deficiency for the ensuing fiscal year.

Respectfully yours,

WILLIAM WINDOM, Secretary.

COMMITTEE MEETINGS. Immediately after this communication was read before the Executive Committee, Commissioner Martindale offered a resolution, which was adopted, declaring that all standing committees be instructed not to meet before the next session of the commis-sion, unless directed by the President. Five standing committees had asked the Execu-tive Committee to meet, but none of them

will be authorized by the President.

The report of the Classification Committee of the World's Fair, in reference to the sub-divisons of departments, shows that in Department A-Agriculture, agricultural machinery and appliances, forest productsthere are 20 groups, and these are subdivided into 127 classes. Department B—Viticulture horticulture and floriculture, has six groups and 37 classes. Department C—One of the most important, is divided into ten groups and 41 classes. Fish and fisheries are in-

cluded in Department D., There are five

OIL CIRCLES. Really Very Little Available Territory to be

FICTITIOUS REPORTS. SENT OUT BY THE BEAR ELEMENT IN

The bearish report promulgated throughout the oil regions for the past 30 days by the bear element of the trade is only anothe evidence of the policy of the Standard Oil Company and their henchmen. The field situation from Allegheny county to West Virginia does not in the least corroborate this assumption. In the old northern and middle fields the production is daily decreasing, while at the same time operations are being greatly curtailed. The facts of the case are that very little available terri-

middle fields, and what remains is of small Wildwood, which has been the center of attraction, and owing to its large produc-tion has exerted a potent influence upon the market, and which has also been augmented by market, and which has also been augmented by prospective territory. The situation to-night, as developed by the drill, draws an entirely different conclusion. The Marshall Oil Company and Harley well on the northeast line of the field is reported through the sand to-night and in the slate. Some practical oil men opinionate that the venture is a duster beyond a doubt but careful observation of the oleaginous events gives this well, so to speak, the benefit of a doubt. It is just possible that the slate strata referred to may only be a break, and that better digging may be found with deeper drilling. In some respects the well bears the characteristics of the Menke venture of the Southeast line.

characteristics of the Menke venture of the Southeast line.

There is no particular change at the Whitesell No. 6, and it may be noted that further drilling has not improved its production, and at present the well looks like a fac simile of the Gibson farm well to the north. The Ringheisen well is still fishing. Chartiers to-day furnishes further proof of the bullish aspect of affairs, and comes to the front with three dry holes. The John A. McKee well, in advance of developments toward Chartiers town, is in and a duster of the first water, while Young on the Taggart, and Snyder on the Hartman is last in the same category. The star of hope is not in the ascendant at Thorn ran, as indicated by the Finnegan & Downing well on the Neely farm, which is scheduled as a small producer. This same company's Winson farm well tapped the sand to-night, which gave forth an abundance of caloric fluid. This is a new feature of the drilling in this field, and the finale can only be told by deeper drilling. The Montour field has long been relegated to the rear ranks, and all prospective territory apparently coopered.

The only news of import from this section tothat date till June 30, 1891. Continuing,

and the finale can only be told by deeper drilling. The Montour field has long been relegated to the rear ranks, and all prospective territory apparently coopered.

The only news of import from this section tonight is the Moore well No. 2, which is four bits in the sand and filled up 1,200 feet with oil. There is no significance whatever attached to this well, and judging from the other wells in this wicinity and its location it is fair to presume that it will be only an ordinary pumper. The McCurdy well, in its present status, has been overestimated, which seems to be the natural inclination and drift of the average oil man to boom all new strikes. From the most authentic source the well this morning under agitation did 15 barrels an hour. Dut to-night was only doing nine barrels an hour. The lucky owners have been offered \$100,000 for their well and 600 or 700 acres of territory, which was promptly refused. The Bridgeville well was erroneously reported this morning as flowing 15 barrels an hour, but the facts are that the well is being tubed and at best will only make a 20 or 25 barrel pumper. Mannington, Helmont and Eureka present no new features, and the indications point to a cutting down on production. At Murdochsville Boggs & Mechilin have just added another proof to the bright prospects of the future by bringing in a dry hole on the Burns farm, located one mile east of the Murdochsville development and three miles southwest of the Ferguson pool. This well virtually cuts off all hope of a connecting link between these developments. There is no other section of the southwest that has any bearing at the present writing upon the situation. Butler county furnishes nothing new, with the exception of Markham & Co.'s well on the McSupher farm, 1½ west of Amberson station, which is said to be good for 60 barrels per day. By some practical oil men, this is taken as an indication of an extension of the old developments. Upon investigation it has been correctly ascertained that there is some oil in the Mount Chesti

The New Pipe Line Project. The Butler county producers have subscribed

150,000 toward the building of a pipe line, while the producers of Washington held another meeting last night at Washington and raised a subscription to the same amount. Twenty or thirty producers of the Millerstown field met last night and subscribed a sufficient sum to build a pipe line to the railroad, where they will ship their product to the independent refiners of Cleveland. Saxonburg producers are contemplating a similar scheme. It is said that the independent refiners of Cleveland are anxious to get Pennsylvania oil, and are encouraging the independent producers in their movement for liberty. It is reported to-night in oil circles that T. W. Phillips, who has been posing as the friend of the producer, has declared himself in favor of the election of Delamater for Governor. While the report is not authenticated, the source from which it emanated bears the imprint of truth.

Two Drillers Killed.

John Carmichael was killed to-day on a drilling well located on the Nicholas farm 100 foot, Butler county. The particulars of the accident Butler county. The particulars of the accident are not at hand. Andrew Wilson was killed by an engine on the Charteers branch of the Panhandle road last evening, while crossing the track from one drilling well to another. The pilot striking him and throwing him some distance. He lived two hours after the accident. Relatives were telegraphed, and are expected to-night.

Use Horsford's Acid Phosphate. Dr. O. C Stout, Syracuse, N. Y., says: "I gave it to one patient who was unable to transact the most ordinary business, because his brain was 'tired and confused' upon the least mental exertion. Immediate benefit, and ultimate recovery followed."

IGHEST	JENNIE JUNE SAYS "'Thepure' Baking Powder makes CE cake that melts in everybody's mouth."	And School of Shorthar SIXTH STREET, Offers the best advantages for thorough education in Bookkeeping and Shortham graduates of this school are more successful than those of any other Pittsburg sci cause of their more thorough training. Call or send for Catalogues. Authority and School are more successful than those of any other Pittsburg sci cause of their more thorough training. Call or send for Catalogues. Authority and School are more successful than those of any other Pittsburg sci cause of their more thorough training. Call or send for Catalogues. And School of Shorthar SIXTH STREET,
XCELLENCE		Before you buy anything ask two quest Bo I really Can I do- want it CTLY Answithout
ROVED	"I use 'thepure'	HONES
PON	BAKING POWDER IN MY KITCHEN, IT IS SO SWEET."	but they will rever prevent you buying SAPOI 10

Its uses are many and so are its friends;
